Kyocera Plans New Manufacturing Plant in Japan's Nagasaki Prefecture by 2026

Company envisions up to 1,000 jobs in Isahaya City as other sites near full capacity.

Kyoto/London, 10th **January 2023.** KYOCERA Corporation informed about plans to build a new manufacturing plant in Isahaya City, Nagasaki Prefecture, to advance its business expansion goals. The company has made an offer to acquire approximately 150,000 square meters (about 37 acres) in the Minami Isahaya Industrial Park.

High level of investment

Kyocera aims to achieve sales of JPY 2 trillion (around 13.755 billion Euro) in its current fiscal year (ending March 31, 2023) and has set a long-term sales target of JPY 3 trillion (around 20.628 billion Euro) by the fiscal year ending March 31, 2029. The company's capital investment is expected to reach a record high of JPY 200 billion (around 1.375 billion Euro) in the current fiscal year, mainly due to strong demand for components related to advanced semiconductors. Kyocera plans even higher levels of investment in FY2024 and beyond, as compared to the FY2023 projection.

Isahaya City – a choice for optimizing future business development

The company's vision for a new plant in Isahaya City comes amid plans to increase production capacity both domestically and internationally, at a time when existing Kyocera campuses have little or no room to expand. The choice of Isahaya City was based on many attributes necessary to optimize future business development, including the area's convenient transportation options, excellent human resources, and superior local infrastructure including energy.

Kyocera believes its future growth plans can contribute to the development of the local community by revitalizing the economy of Nagasaki Prefecture and creating new employment opportunities.

Outline of Land Acquisition

Name	Minami Isahaya Industrial Park
Location	Oguri District, Isahaya City, Nagasaki Prefecture, Japan
Total area	Approximately 150,000 m ²
Operation to begin	2026

About Kyocera

Headquartered in Kyoto, Japan, KYOCERA Corporation is one of the world's leading manufacturers of fine ceramic components for the technology industry. The strategically important divisions in the KYOCERA Group, which is comprised of 298 subsidiaries (as of March 31, 2022), are information and communications technologies, products which increase quality of life, and environmentally friendly products. The technology group is also one of the most experienced producers of smart energy systems worldwide, with more than 45 years of know-how in the industry. The company is ranked #665 on Forbes magazine's 2022 "Global 2000" listing of the world's largest publicly traded companies.

With a global workforce of over 83,000 employees, Kyocera posted sales revenue of approximately €13,42 billion in fiscal year 2021/2022. The products marketed by the company in Europe include printers, digital copying systems, semiconductor-, fine ceramic-, automotive- and electronic components as well as printing devices and ceramic kitchen products. The KYOCERA Group has two independent companies in the United Kingdom: KYOCERA Fineceramics Ltd. and KYOCERA Document Solutions Ltd.

The company also takes an active interest in cultural affairs. The Kyoto Prize, a prominent international award, is presented each year by the Inamori Foundation — established by Kyocera founder Dr. Kazuo Inamori — to individuals worldwide who have contributed significantly to the scientific, cultural, and spiritual betterment of humankind (approximately €710,000* per prize category).
